

A Brief Overview

Farmacy Food is a tech-enabled food startup that takes the "Let food be thy medicine" quote literally and creates tasty meals around peoples' dietary needs.

Our mission is to make health and wellness radically affordable and accessible. Towards that end, we have recently expanded to offer Smartfridges, a glass front refrigerated vending machine, where your residents can conveniently access healthy food 24/7. It's almost like having a mini (2ft X 2ft) healthy restaurant in your apartment building!

Building a Healthy & Vibrant Community

More and more people want to eat healthier. However, the time it takes to do the proper research to understand what is truly nutritious, gather materials to prepare meals, and finally craft those meals in a satisfactory way is time prohibitive. With our team of chefs and nutritionists we create healthy, locally sourced meals that are delicious and affordably priced to make it easy for people to eat healthy consistently.

After we install a Smartfridge, we take care of every detail from re-stocking, maintenance, etc. and leverage technology to ensure quality control and inventory levels are properly maintained.

Convenient & Contactless

Our Smartfridges provide a "Grab & Go" option within a strategic location within your establishment. Tenants will be able to access with their debit/credit card or they can order online and effortlessly walk down to pick up their meal. Tenants have quick and easy access to healthy food, while being socially distant.

Our Offer to You

Moving and unpacking can be as exciting as it is stressful. We want to assist in making that special move-in day more pleasant by providing a free meal coupon for new tenants to be used on move-in day or their first week in their new home!

We hope that you see tremendous value in offering this unique amenity to your tenants and that you'll join us in helping to make health and wellness more affordable and accessible!

Farmacy Food Smartfridge Specs
